Garden Tips

Safe and simple way to kill weeds. Here is a DIY recipe to make weed killer:

Instructions: Mix ingredients in an empty gallon jug and then pour in a spray bottle.

- 1 gallon white vinegar
- 1 cup of table salt
- 1 tbsp of Dawn dish soap

This really works, so keep it away from your lawn, flower, and other plants. It will kill them, too! Best used for sidewalk cracks and mulch areas. May not work on wire weed/Bermuda grass.

The Social Committee

Over the last three years a few of the ladies in the neighborhood have gotten together and planned outings and parties for the community. Now that COVID-19 is dwindling, and most are vaccinated, our community is ready to welcome anyone (women and/or men) who likes to plan events or just have fun to join our team. Our meetings are sporadic and typically warrant little time away from home. We're in the process of regrouping and would like to invite you personally to join us. If you're still not feeling comfortable about in-person meetings you can still attend via Zoom. Please contact Barbara Studer-Baer at studerbaer@gmail.com if you are interested.

There are other committees within our neighborhood that could use some expertise or extra hands. For more information about our committees please visit [Fork Landing Website](#). If you're thinking about adding a fence, pool, awnings, patio, etc. click here for an [Application](#).
